

The state Bicycle and Pedestrian Coordinator at the Kentucky Transportation Cabinet is working toward eight goals to advance bike and pedestrian transportation. These goals encompass statewide policies and planning; manuals and guides for communities; investment in infrastructure and education; improved publicity for tourism; and adequate staffing to meet the rising demand of this growing transportation need.

In January 2022, the board of Bike Walk Kentucky voted to endorse these goals. Please join us as we work together to educate and advocate for safe bicycling and walking across Kentucky.
